### WORK EXPERIENCE

#### SOFTWARE ENGINEER

2014 - 2017

Orange, Paris

Refer to: Benoit Gandelot

Done during a sandwich course in the Research and Development division. Working for a mediation ecosystem providing Orange partners with APIs on behalf on the Orange affiliates.

I worked on the cloud API which allows partners to interact with a user's personal storage. I have made source code auditing and work on performance improvements by implementing concurrency and parallelism with Java 8 and moving to a micro-services architecture with Spring Boot and Docker. I was working in collaboration with Poland and Romania subsidiaries.

I made the BI team platform with Thymleaf and Spring, which allow to schedule requests and send the results to the marketing team.

I made the payment platform for the SMS API, which allows a partner to pay for SMS bundles and sent these automatically.

#### FULLSTACK DEVELOPER

April 2017 -

Charme d'Orient, Paris

Refer to: Sofiane Djadri

As a freelance, I work on the company's Prestashop CMS to develop a new theme using Bootstrap and migrate the instance to a newer version of Prestashop.

#### FULLSTACK DEVELOPER

05/2016 - 12/2016

Univers-Obsèques, Paris

Refer to: Manuela Gourmaud

As a freelance, I worked on the platform which allows users to compare funeral services estimates. I worked on the e-shop and the professional space of the website. Made from scratch using Grails Framework in Groovy with another freelance.

#### FULLSTACK DEVELOPER

06/2016 12/2016

La Compagnie Littéraire, Paris

Refer to: Monika Kliava

As a freelance, I made the new website with Wordpress, developed and integrated the new theme using Bootstrap. I setup and administered the Debian server.

#### .NET DEVELOPER

2013 - 2014

LP Services, Paris

Refer to: Dominique Jardin

Done during a sandwich course.

I made the development and the evolution of the business web application using the .NET framework in C#. It manages the stock, estimates, intervention, and technicians schedule.

I developed the internal iOS mobile application with Xamarin in C# to allow technicians to change the status of the interventions and
